FOR ADMINISTRATOR & AGENT USE

Participant Name: _____ Date: _____ Session ID: _____

Age Group Selected: ☐ 11–18 Years ☐ 19–32 Years Administrator: _____

Total Score: ____ / 100 Verbal: ____ / 25 Quantitative: ____ / 25 Psychometric: ____ / 25
Performance: ____ / 25

ASSESSMENT OVERVIEW & INSTRUCTIONS

About this Assessment

This IQ Assessment Questionnaire is a component of the QIDS (Quotient Intelligence Development System) model. It evaluates four core dimensions of Intelligence Quotient: Verbal IQ, Quantitative IQ, Psychometric IQ, and Performance IQ. Each component addresses distinct cognitive competencies aligned with the QIDS Evaluation Framework.

IQ Component	Marks	Time	Sub-Components
Verbal IQ	25	25–30 min	Vocabulary · Grammar · Language Skills
Quantitative IQ	25	25–30 min	Problem Solving · Calculation Skills · Logical Reasoning
Psychometric IQ	25	25 min	Cognitive Flexibility · Memory & Recall · Attention & Focus
Performance IQ	25	30–40 min	Reading & Writing · Audio-Visual · Kinesthetic · Self-Learning · Creative
TOTAL	100	~2 hrs	Full cognitive spectrum assessment

General Instructions

- Read each question carefully before responding. Answer as honestly and completely as possible.
- For multiple choice questions (MCQ), circle or write the letter of the correct option.
- For written responses, write in the answer spaces provided. Use additional sheets if necessary.
- For image-based questions, the administrator or system will provide the visual stimulus.
- Some Performance IQ tasks are administered and observed by an evaluator. Follow their instructions.
- Manage your time — move on if stuck and return to unanswered questions at the end.
- Marks allocation is shown in brackets [] next to each question.
- The QIDS agent will use this document as the knowledge base to generate customised assessment sessions based on participant age, context, and requirements.

Age-Group Calibration

11–18 Years (Secondary/Senior Secondary) • Curriculum-aligned with progressive academic demands • Emphasis on conceptual understanding and skill development	19–32 Years (Young Adult / Early Career) • Professional and applied cognitive demands • Advanced analytical, critical and strategic thinking
---	---

- Pattern recognition, structured reasoning, school-level mathematics
- Self-awareness and early metacognitive skills
- Creative expression and kinesthetic coordination

- Data interpretation, professional writing, formal logic
- Sophisticated metacognition and autonomous learning
- Innovation, systems thinking and professional creativity

SECTION A

AGE GROUP: 11 – 18 YEARS

Secondary School & Senior Secondary | Total IQ Score: 100 Marks

VERBAL IQ

Language, Vocabulary, Grammar & Comprehension

IQ Component: Verbal IQ | Total Marks: 25 | Estimated Time: 20–25 minutes

SUB-COMPONENT 1: Vocabulary

10 Marks

Part A — Word Definitions (MCQ)

5 Marks

 **Instructions:** Choose the correct definition for each word. Circle or write the letter of the best answer.

- Q1.** What does the word "Ambiguous" mean? [1]
- A. Clear and specific
 - B. Open to more than one interpretation
 - C. Strictly forbidden
 - D. Enthusiastically accepted
- Q2.** What does the word "Diligent" mean? [1]
- A. Careless and hasty
 - B. Stubbornly resistant
 - C. Hardworking and persistent
 - D. Easily distracted
- Q3.** What does the word "Candid" mean? [1]
- A. Secretive and deceptive
 - B. Truthful and straightforward
 - C. Indifferent to others
 - D. Overly emotional
- Q4.** What does the word "Profound" mean? [1]
- A. Shallow and simple
 - B. Loud and disruptive
 - C. Showing great knowledge or depth
 - D. Amusing and light-hearted
- Q5.** What does the word "Persevere" mean? [1]
- A. Give up at the first obstacle
 - B. Continue steadily despite difficulty
 - C. Change one's opinion quickly

- D. Act without thinking

Part B — Word Usage in Context**5 Marks**

 **Instructions:** Fill in the blank with the most appropriate word from the options given.

- Q6.** The scientist presented a _____ argument that convinced the entire panel. [1]
A. trivial
B. compelling
C. vague
D. repetitive
- Q7.** Despite the heavy criticism, she remained _____ in her beliefs. [1]
A. wavering
B. resilient
C. oblivious
D. hesitant
- Q8.** The new policy was _____ to all students, with no exceptions. [1]
A. subjective
B. ambiguous
C. applicable
D. irrelevant
- Q9.** He gave a _____ speech that moved the audience to tears. [1]
A. monotonous
B. incoherent
C. poignant
D. mundane
- Q10.** The athlete's _____ training schedule contributed to her success. [1]
A. erratic
B. rigorous
C. casual
D. sporadic

SUB-COMPONENT 2: Grammar**10 Marks****Part A — Error Identification****4 Marks**

 **Instructions:** Each sentence below contains one grammatical error. Identify and correct it.

Q11. She don't know the answer to any of the questions on the test. [1]

Correction:

Q12. Neither the teacher nor the students was present during the fire drill. [1]

Correction:

Q13. He was so tired that he layed down on the sofa after school. [1]

Correction:

Q14. The team of players are planning to travel to the national championships. [1]

Correction:

Part B — Sentence Transformation

3 Marks

 **Instructions:** Rewrite the following sentences as instructed without changing the meaning.

Q15. Active to Passive: "The committee reviewed all the proposals." [1]

Rewrite: _____

Q16. Direct to Indirect Speech: He said, "I will finish the project by tomorrow." [1]

Rewrite: _____

Q17. Combine using a relative clause: "She is a talented singer. She won the competition." [1]

Combined sentence: _____

Part C — Comprehension Passage**3 Marks**

 **Instructions:** Read the passage carefully and answer the questions that follow.

Passage:

Biodiversity refers to the variety of life on Earth — from the smallest microorganism to the largest whale. It encompasses the diversity within species, between species, and of ecosystems. Over the past century, human activities such as deforestation, pollution, and climate change have accelerated the rate of species extinction to an alarming degree. Scientists estimate that we are currently losing species at 1,000 times the natural background rate. Protecting biodiversity is not merely an ethical responsibility; it is essential for human survival. Ecosystems provide services such as clean water, air purification, crop pollination, and climate regulation that are indispensable to all life on Earth.

Q18. According to the passage, what are THREE human activities that have accelerated species extinction?

[1]

Answer:

Q19. What does the author mean by 'background rate' of extinction? Why is the current rate considered alarming?

[1]

Answer:

Q20. Explain why protecting biodiversity is described as 'essential for human survival.' Use evidence from the passage.

[1]

Answer:

SUB-COMPONENT 3: Language Skills**5 Marks****Written Expression & Communication****5 Marks**

Instructions: Answer each question thoughtfully in complete sentences.

- Q21.** Write a topic sentence and two supporting sentences for an essay arguing that students should spend more time reading books than browsing social media. [1]

Answer:

- Q22.** Identify the figure of speech in: "The world is a stage, and all the men and women merely players." Explain its meaning in 1–2 sentences. [1]

Answer:

- Q23.** Rewrite this confusing sentence to make it clearer: "The report which was written by the student who failed was unclear about the project that was assigned last month." [1]

Answer:

- Q24.** What is the difference between 'infer' and 'imply'? Give one example sentence for each. [1]

Answer:

- Q25.** Describe a time when choosing the right words made an important difference. Write 3–4 sentences. [1]

Answer:

QUANTITATIVE IQ

Problem Solving, Calculation & Logical Reasoning

IQ Component: Quantitative IQ | Total Marks: 25 | Estimated Time: 25–30 minutes

SUB-COMPONENT 1: Problem Solving

10 Marks

Part A — Word Problems

5 Marks

 **Instructions:** Solve each problem. Show your working where possible.

- Q1.** A factory produces 240 units in 8 hours. If it operates for 6 hours on a reduced shift, how many units will it produce? (Assume constant rate) [1]

Working & Answer:

- Q2.** A shopkeeper buys a jacket for ₹1,200 and sells it at a 25% profit. If he later offers a 10% discount on the selling price, what is the final selling price? [1]

Working & Answer:

- Q3.** Two pipes A and B can fill a tank in 12 hours and 18 hours respectively. If both pipes are opened simultaneously, how long will it take to fill the tank? [1]

Working & Answer:

- Q4.** A train travels from City X to City Y at 80 km/h and returns at 60 km/h. What is the average speed for the entire journey? [1]

Working & Answer:

- Q5.** In a class of 40 students, 60% passed Mathematics, 75% passed Science, and 45% passed both. How many students failed in both subjects? [1]

Working & Answer:

Part B — Applied Mathematics

5 Marks

 **Instructions:** Choose the correct answer or solve as indicated.

- Q6.** If the ratio of boys to girls in a school is 5:3 and there are 240 girls, how many students are there in total? [1]
- A. 350
 - B. 400
 - C. 480
 - D. 600
- Q7.** A rectangle has a perimeter of 56 cm. If its length is twice its width, what is its area? [1]
- A. 196 sq cm
 - B. 224 sq cm
 - C. 168 sq cm
 - D. 256 sq cm
- Q8.** Solve: $3x^2 - 12 = 0$. What are the values of x ? [1]
- A. $x = \pm 2$
 - B. $x = \pm 4$
 - C. $x = \pm 3$
 - D. $x = \pm 6$
- Q9.** If 20% of a number is 45, what is 35% of that number? [1]
- A. 78.75
 - B. 63.25
 - C. 80.50
 - D. 56.25
- Q10.** A bag contains 4 red, 6 blue and 5 green marbles. What is the probability of drawing a blue marble? [1]
- A. $\frac{2}{5}$
 - B. $\frac{6}{15}$
 - C. $\frac{1}{3}$
 - D. $\frac{2}{5}$ and $\frac{6}{15}$ are the same

SUB-COMPONENT 2: Calculation Skills**10 Marks****Part A — Arithmetic Operations****4 Marks** **Instructions:** Solve the following calculations. Show working where required.

Q11. Evaluate: $4^3 + \sqrt{144} - (18 \div 3) \times 2$ [1]

Working & Answer:

Q12. Simplify: $(\frac{3}{4} + \frac{5}{6}) - (\frac{1}{3} \times \frac{9}{4})$ [1]

Working & Answer:

Q13. If $a = 3$ and $b = -2$, evaluate: $2a^2 - 3ab + b^2$ [1]

Working & Answer:

Q14. Find the LCM and HCF of 36, 48, and 60. [1]

Working & Answer:

Part B — Speed Calculation (Mental Math)**3 Marks — Time Limit:
3 minutes** **Instructions:** Solve each calculation as quickly as possible. Write only the answer.

Q15. $23 \times 17 = ?$ [1]

Answer:

Q16. $512 \div 8 = ?$

[1]

Answer:

Q17. $345 + 289 - 176 = ?$

[1]

Answer:

Part C — Data Interpretation

3 Marks

 **Instructions:** Use the data table below to answer the questions.

Subject	Jan	Feb	Mar	Apr	May
Mathematics	72	78	83	79	88
Science	65	70	74	80	85
English	80	76	82	84	90

Q18. What is the percentage increase in Mathematics score from January to May?

[1]

Answer:

Q19. In which subject did the student show the most consistent improvement over the five months?

[1]

Answer:

Q20. Calculate the average score across all three subjects in March.

[1]

Answer:

SUB-COMPONENT 3: Logical Reasoning

5 Marks

Number Patterns, Sequences & Logic Puzzles

5 Marks

 **Instructions:** Identify patterns, complete sequences, or solve the logic problem as stated.

Q21. Find the next two terms: 1, 3, 7, 15, 31, ____, ____

[1]

Answer/Working:

Q22. What is the missing number? 4, 9, 25, 49, ?, 169

[1]

Answer/Working:

Q23. If ALL managers are leaders, and SOME leaders are visionaries, can we conclude that SOME managers are visionaries?

[1]

- A. Yes, definitely
- B. No, not necessarily
- C. Only if the managers are senior
- D. The statement is contradictory

Answer/Working:

Q24. Arrange these steps in the correct logical order to solve a problem:
i. Test the solution ii. Define the problem clearly iii. Evaluate the results
Generate possible solutions iv. v. Select the best solution

[1]

Answer/Working:

Q25. A box contains only red and blue balls. The probability of picking a red ball is $\frac{3}{7}$. If there are 21 balls in total, how many are blue?

[1]

Answer/Working:

PSYCHOMETRIC IQ

Cognitive Flexibility, Memory & Attention

IQ Component: Psychometric IQ | Total Marks: 25 | Estimated Time: 25 minutes

SUB-COMPONENT 1: Cognitive Flexibility

10 Marks

Part A — Inductive Reasoning

5 Marks

 **Instructions:** Study the patterns and answer the questions.

[IMAGE PLACEHOLDER]

3×3 Matrix Pattern — Row 1: Circle(1 dot), Square(2 dots), Triangle(3 dots) | Row 2: Circle(2 dots), Square(4 dots), Triangle(6 dots) | Row 3: Circle(3 dots), Square(6 dots), Triangle(?) — Options: A) Triangle(9 dots) B) Triangle(6 dots) C) Triangle(12 dots) D) Triangle(8 dots)

(Large image | Insert before printing/digitizing)

Q1. Based on the matrix above, which figure belongs in the position marked '?' [1]
(Select option letter)

Selected Option:

[IMAGE PLACEHOLDER]

Odd-one-out shapes puzzle: Four geometric figures — A) A pentagon with all equal sides B) A regular hexagon C) An equilateral triangle D) A scalene triangle. Students identify the odd one out and explain.

(Medium image | Insert before printing/digitizing)

Q2. Which figure is the odd one out in the set above? Explain your reasoning. [1]

Answer + Reason:

Q3. Identify the rule and complete: J, M, P, S, ____ [1]

Answer:

Q4. Complete the analogy: Book : Library :: Painting : ____ (A) Artist (B) Museum [1]
(C) Canvas (D) Colour

Answer:

Q5. A code uses letters shifted by a fixed number: CAT = FDW. Decode: KPI [1]

Answer:

Part B — Deductive & Abstract Reasoning

5 Marks

 **Instructions:** Apply logical deduction to answer each question.

Q6. All mammals are warm-blooded. Dolphins are mammals. Therefore: [1]

- A. Dolphins are cold-blooded
- B. Dolphins are warm-blooded
- C. Only some dolphins are warm-blooded
- D. Not enough information

Answer:

Q7. In a race, Priya finished before Anjali, Anjali finished before Meena, and Riya finished after Meena. Who finished last? [1]

- A. Priya
- B. Anjali
- C. Meena
- D. Riya

Answer:

Q8. If 'STRONG' is coded as 'UVTQPI', what is the code for 'BRIGHT'? [1]

Answer:

Q9. Which of the following best describes the relationship: Virus is to Infection as Rain is to ____? [1]

- A. Cloud
- B. Flood
- C. Weather
- D. Water

Answer:

Q10. A farmer has chickens and cows. He counts 50 heads and 140 legs. How many chickens does he have? [1]

Answer:

SUB-COMPONENT 2: Memory & Recall

10 Marks

Part A — Short-Term Memory (Read-then-Recall)

5 Marks — Administer Separately

 **Read aloud to student (or allow 60 seconds to read):**

On a rainy Thursday in November, Kabir visited the central library on Elgin Street. He borrowed three books: a novel about ancient civilizations, a guidebook on astronomy, and a short story collection by Indian authors. The librarian's name was Mrs. Sharma, and she stamped the books for a 2-week loan period. Kabir paid ₹20 for a lost book from his previous visit.

➔ **After reading, cover this passage and answer the questions below.**

Q11. What was the day and month of Kabir's library visit? [1]

Answer:

Q12. On which street is the central library located? [1]

Answer:

Q13. List all three books Kabir borrowed. [1]

Answer:

Q14. What was the librarian's name? [1]

Answer:

Q15. How much did Kabir pay, and why?

[1]

Answer:

Part B — Working Memory & Sequencing

5 Marks

 **Instructions:** Complete each task carefully. These test your ability to hold and manipulate information.

Q16. Repeat the following digit sequence backwards: 7, 4, 9, 2, 6, 1 Write the reversed sequence: ____

[1]

Answer:

Q17. Sort these mixed numbers and letters in ascending order (numbers first, then letters alphabetically): B, 5, A, 2, D, 8, C, 1 Sorted order: ____

[1]

Answer:

Q18. Read the word list once. Cover it, then write all the words you recall. Word list: [1]
Telescope, Marble, Thunder, Envelope, Cinnamon, Glacier, Lantern Recalled
words: ____

Answer:

Q19. Perform the following mental operations and write the answer only: Start with [1]
100 → subtract 13 → multiply by 2 → divide by 3 → add 17 Final answer: ____

Answer:

Q20. Below is a brief schedule. After reading, answer the question WITHOUT [1]
re-reading: Monday: Sports | Tuesday: Art | Wednesday: Science Lab |
Thursday: Library | Friday: Music Q: Which activity falls on the day after Art?

Answer:

SUB-COMPONENT 3: Attention & Focus

5 Marks

Selective Attention & Sustained Focus Tasks

5 Marks — Time Limit:
5 minutes

 **Instructions:** Complete these tasks accurately within the given time. Speed and accuracy both matter.

Q21. Symbol Coding (1 mark | 90 seconds): Use the key to encode the number sequence. Key: 1=★ 2=◆ 3=▲ 4=● 5=■ 6=◇ 7=⊙ 8=⊕ 9=⬢ 0=⊗ [1]
Encode: 3, 7, 1, 5, 9, 2, 4, 8, 6, 0

Encoded sequence:

Q22. Cancellation Task (1 mark | 60 seconds): In the letter grid below, cross out ALL occurrences of the letter 'T' as fast as possible. Count and record the total. [1]

P	T	R	A	T	L	M	N	T	B	C	T	F	G	T	H	J	T	K	Q
T	W	E	T	Y	U	T	O	I	T	A	S	D	T	F	G	H	J	K	T
L	T	Z	X	C	T	V	B	N	T	M	T	Q	W	E	T	R	Y	U	I

Total count of 'T':

Q23. Spot the Difference (1 mark | 90 seconds): Look at the two sequences below and identify the ONE element that differs. Sequence A: ▲ ● ■ ◆ ◇ ★ ⊙ ⊕ ⬢ [1]
Sequence B: ▲ ● ■ ◆ ◇ ★ ⊙ ⬢ ⊕ Difference found at position: ____

Answer:

Q24. Selective Listening/Reading (1 mark): Read the paragraph and count how many times the word 'and' appears. "Reading and writing are fundamental skills, and together they form the foundation of communication and learning. Students who read regularly and write often develop stronger vocabulary and critical thinking, and these skills serve them well in school and beyond." Count of 'and': ____ [1]

Answer:

Q25. Pattern Error Detection (1 mark): Identify the position of the error in this number series: 2, 4, 8, 16, 32, 63, 128, 256 Error at position ____, Corrected value: [1]

Answer:

PERFORMANCE IQ

Reading & Writing, Audio-Visual, Kinesthetic, Self-Learning & Creative

IQ Component: Performance IQ | Total Marks: 25 | Estimated Time: 30 minutes (some tasks may be observed)

SUB-COMPONENT 1: Reading & Writing

5 Marks

Comprehension, Analysis & Written Creation

5 Marks

 **Instructions:** Read carefully and complete each task in writing.

- Q1.** Read the following quote and explain its meaning in 3–4 sentences, drawing on a real-world example: "The measure of intelligence is the ability to change." — Albert Einstein [1]

Response:

- Q2.** Write a short persuasive paragraph (5–6 sentences) arguing FOR or AGAINST the following statement: "Homework should be abolished in secondary schools." [1]

Response:

- Q3.** Summarize the following text in no more than 3 sentences, capturing the core idea: "Artificial intelligence is rapidly transforming every sector of society, from healthcare diagnostics to creative arts. While it offers unprecedented efficiency and capability, it raises profound questions about human identity, employment, and ethical responsibility. The challenge for the next generation is not to resist this transformation but to navigate it wisely." [1]

Response:

- Q4.** Identify the main argument, one piece of evidence, and one counter-argument in this excerpt: "Exercise is the single most effective tool for improving mental health. Studies consistently show that 30 minutes of moderate exercise reduces anxiety symptoms by up to 40% and improves mood through the release of endorphins. Critics argue that access to exercise is not equal across socioeconomic groups, limiting its universal applicability." [1]

Response:

- Q5.** Create a 5-line poem or haiku that captures the concept of 'perseverance'. You may choose your own format. [1]

Response:

SUB-COMPONENT 2: Audio-Visual Processing

5 Marks

Visual Interpretation & Perceptual Organization

5 Marks

 **Instructions:** Study each visual and answer the questions. For image-based items, the administrator provides the image separately.

[IMAGE PLACEHOLDER]

Bar chart: Monthly sales data for 4 products (Jan–Jun). Product A peaks in March; Product B is consistent; Product C declines; Product D spikes in May. Y-axis: Units (0–500), X-axis: Months.
Title: 'Quarterly Sales Overview'

(Large image | Insert before printing/digitizing)

- Q6.** Looking at the bar chart above: a) Which product had the highest single-month sales? In which month? b) Which product shows a declining trend? Describe the pattern. c) Calculate the approximate average monthly sales of Product B. [2]

Answers (a, b, c):

[IMAGE PLACEHOLDER]

*Venn Diagram: Two overlapping circles. Circle A: 'Students who play sports' (shows 15 in A only).
Circle B: 'Students who play a musical instrument' (shows 12 in B only). Overlap: 8 students.
Outside both: 5 students. Total students = 40.*

(Medium image | Insert before printing/digitizing)

- Q7.** Based on the Venn diagram: a) How many students play sports but not an instrument? b) What percentage of all students play both sports and an instrument? c) How many students play neither? [1]

Answers (a, b, c):

[IMAGE PLACEHOLDER]

Spot-the-difference image pair: Two nearly identical scenes of a classroom with 5 subtle differences (e.g., clock shows different time, one poster missing, window shade up vs down, different number of pencils, board text slightly different)

(Large image | Insert before printing/digitizing)

- Q8.** Identify and list ALL 5 differences between the two classroom images. Be specific about location and nature of each difference. [1]

Differences found:

- Q9.** A diagram shows a cube unfolded into a net. If the TOP face shows a star (★), the FRONT shows a circle (●), and the RIGHT face shows a triangle (▲), which face is opposite the star? (A) Front face (B) Bottom face (C) Left face (D) Back face [1]

- A.** Front face
B. Bottom face

- C. Left face
- D. Back face

- Q10.** Spatial Rotation: A shape is rotated 90° clockwise and then reflected along a vertical axis. If the original arrow points UP-RIGHT, which direction does it point after both transformations? (A) DOWN-LEFT (B) DOWN-RIGHT (C) UP-LEFT (D) UP-RIGHT [1]
- A. DOWN-LEFT
 - B. DOWN-RIGHT
 - C. UP-LEFT
 - D. UP-RIGHT

SUB-COMPONENT 3: Kinesthetic Intelligence

5 Marks

Physical Coordination, Spatial Awareness & Applied Tasks

**5 Marks —
Observed/Self-Reported**

 **Instructions:** These tasks are assessed through direct observation or honest self-report. The administrator scores based on quality and completion.

- Q11.** Origami/Folding Task (Observed | 2 marks): Follow the step-by-step diagram provided and fold the paper into the indicated shape. The evaluator assesses precision, symmetry, and completion. Shape: Paper crane or geometric pyramid (as per evaluator's choice). Score (1–2): ____ Comments: ____ [1]

Response/Score:

- Q12.** Tracing Task (1 mark | 60 seconds): Trace the maze from START to END using a pencil without lifting it or crossing any walls. [Maze diagram to be printed on separate sheet] [1]

Response/Score:

- Q13.** Body Coordination Self-Report (1 mark): On a scale of 1–5, how accurately can you perform the following task without practice? Task: Balance on one foot for 10 seconds with eyes closed. Rate yourself: 1 (Cannot do) | 2 (Briefly) | 3 (5 seconds) | 4 (7–8 seconds) | 5 (10+ seconds) Self-rating: ____ | Observed rating (if assessed): ____ [1]

Response/Score:

- Q14.** Build & Design (Observed | 1 mark): Using 6 rectangular tiles/blocks, construct the tallest possible free-standing tower in 90 seconds. The evaluator rates stability and height. Height achieved: ____ blocks Score: ____ [1]

Response/Score:

SUB-COMPONENT 4: Self-Learning

5 Marks

Independent Goal-Setting, Learning Strategies & Metacognition

5 Marks

 **Instructions:** Answer honestly. There are no right or wrong answers — this assesses your awareness of how you learn.

- Q15.** Describe a topic or skill you taught yourself (outside school) in the past year. What steps did you take to learn it? What made it challenging? [1]

Response:

- Q16.** When you don't understand something in class, what is your go-to strategy to figure it out on your own before asking for help? [1]

Response:

- Q17.** Set a SMART goal (Specific, Measurable, Achievable, Relevant, Time-bound) for something you want to improve academically in the next 3 months. [1]

Response:

- Q18.** Evaluate your own learning style by rating each below (1 = Rarely, 5 = Always): [1]
a) I prefer to see diagrams rather than read text. Rating: ____ b) I learn better by doing things hands-on. Rating: ____ c) Listening to explanations helps me most. Rating: ____ d) I like reading and taking notes. Rating: ____
Based on your ratings, which learning style fits you best and why?

Response:

- Q19.** Describe a time you made an error in learning or a test. How did you identify what went wrong and what did you change afterwards? [1]

Response:

SUB-COMPONENT 5: Creative Intelligence

5 Marks

Divergent Thinking, Innovation & Creative Expression

5 Marks

 **Instructions:** Let your imagination lead. Originality and thoughtfulness are valued more than conventional answers.

- Q20.** Alternative Uses Test (1 mark | 2 minutes): List as many UNUSUAL or creative uses as you can think of for an ordinary brick. Go beyond the obvious. [1]
Minimum 5 responses for full marks:

Response:

- Q21.** Visual Creation (1 mark): In the box below, create a simple drawing that represents the concept of 'time passing'. There are no rules — express it freely. [1]
[Drawing box — 6cm × 6cm — to be printed here]

Response:

- Q22.** Inventive Problem Solving (1 mark): Imagine your school has no electricity for an entire week. Design one creative system that would allow lessons to continue effectively without any digital technology. [1]

Response:

Q23. Story Starter (1 mark | Write 5–7 sentences): Continue this story in a creative and unexpected direction: "The library door opened for the last time at midnight. Inside, every book was blank — except one..." [1]

Response:

Q24. Creative Connections (1 mark): Identify a surprising or non-obvious connection between the following three concepts, then explain it in 2–3 sentences: [1]
Concepts: A spider's web / The internet / Human memory

Response:

SECTION B

AGE GROUP: 19 – 32 YEARS

Young Adult & Early Career | Total IQ Score: 100 Marks

VERBAL IQ

Language, Vocabulary, Grammar & Communication

IQ Component: Verbal IQ | Total Marks: 25 | Age Group: 19–32 Years | Estimated Time: 25–30 minutes

SUB-COMPONENT 1: Vocabulary

10 Marks

Part A — Advanced Word Definitions & Usage

5 Marks

 **Instructions:** Choose the best definition or usage for each word. These are drawn from professional and academic contexts.

- Q1.** The word "Equivocal" most precisely means: [1]
- A. Completely certain and unambiguous
 - B. Deliberately unclear or ambiguous to avoid commitment
 - C. Excessively emotional in expression
 - D. Logically consistent and accurate
- Q2.** The word "Sycophant" most precisely means: [1]
- A. A skilled mediator between groups
 - B. A person who acts obsequiously to gain favour
 - C. An innovative problem-solver
 - D. A principled whistleblower
- Q3.** The word "Veracity" most precisely means: [1]
- A. Courage in the face of adversity
 - B. Extreme precision in mathematical calculation
 - C. Conformity to facts and truthfulness
 - D. The quality of being adaptable
- Q4.** The word "Perfidious" most precisely means: [1]
- A. Extremely detailed and thorough

- B. Deceitful and untrustworthy, especially by betrayal
- C. Pertaining to matters of finance
- D. Demonstrating great generosity

Q5. The word "Ephemeral" most precisely means: [1]

- A. Deeply embedded and long-lasting
- B. Lasting only a short time; transitory
- C. Pertaining to abstract philosophical inquiry
- D. Internationally significant

Part B — Critical Reading & Vocabulary in Context

5 Marks

 **Instructions:** Read each sentence and select the word that best completes it logically and stylistically.

Q6. The CEO's decision to _____ company resources without board approval was both reckless and unethical. [1]

- A. appropriate
- B. allocate
- C. divert
- D. synthesize

Q7. Her _____ approach to negotiations — offering concessions while maintaining core demands — ultimately secured a favourable agreement. [1]

- A. pragmatic
- B. inflexible
- C. negligent
- D. adversarial

Q8. The researcher cautioned that the preliminary data, while promising, should not be _____ to broader populations without further study. [1]

- A. extrapolated
- B. replicated
- C. discounted
- D. aggregated

Q9. The defendant's _____ testimony — contradicting his earlier statements on three key points — significantly undermined the defence. [1]

- A. consistent
- B. incriminating
- C. equivocal
- D. credible

Q10. The report's _____ conclusions masked the significant variance in the underlying data, presenting a misleadingly uniform picture. [1]

- A. granular
- B. nuanced
- C. aggregate
- D. contradictory

SUB-COMPONENT 2: Grammar**10 Marks****Part A — Professional Writing Mechanics****4 Marks**

 **Instructions:** Correct the grammatical and stylistic errors in each sentence for professional usage.

Q11. Between you and I, the proposal lacks the specificity required for board approval. [1]

Corrected sentence:

Q12. Having submitted the report, the deadline was considered met by the committee. [1]

Corrected sentence:

Q13. The data suggests that neither the first hypothesis nor the second one are supported by the evidence. [1]

Corrected sentence:

Q14. The team comprised of five specialists, each of which brought a unique expertise to the project. [1]

Corrected sentence:

Part B — Advanced Writing Transformation**3 Marks**

 **Instructions:** Rewrite as instructed, maintaining professional clarity and accuracy.

Q15. Rewrite in formal register without changing the meaning: "We need you to get the stuff sorted by end of day or things are gonna go sideways." [1]

Formal version:

- Q16.** Condense the following into one clear, concise sentence without losing key meaning: "The project, which had been running for approximately eighteen months and during which time three different project managers had been appointed, was finally completed at the end of the financial year, having consumed a budget that was nearly double the original estimate." [1]

Condensed version:

- Q17.** Write an impactful executive summary opening sentence (1 sentence only) for: "A 12-month study on remote work productivity in 500 IT companies showing 23% productivity gain but 31% increase in employee burnout" [1]

Opening sentence:

Part C — Critical Comprehension

3 Marks

 **Instructions:** Read the passage and answer the analytical questions that follow.

Passage:

Automation and artificial intelligence are reshaping the global workforce at an unprecedented pace. Economists estimate that up to 85 million jobs may be displaced by technology by 2025, while simultaneously predicting the emergence of 97 million new roles adapted to this changing landscape. The optimistic narrative frames automation as a net positive — a tool for human liberation from repetitive labour, enabling workers to focus on higher-order cognitive and creative tasks. The pessimistic counter-narrative, however, points to the unequal distribution of these disruptions: low-income workers in routine-task occupations face displacement, while the benefits accrue primarily to those already possessing advanced technical skills. The central policy challenge, therefore, is not whether to embrace automation, but how to ensure that its dividends are distributed equitably.

- Q18.** What is the author's central argument? Identify the key tension the author presents. [1]

Analysis:

- Q19.** Analyse the phrase 'unequal distribution of disruptions'. What specific evidence does the author provide and what does this imply for policy priorities? [1]

Analysis:

Q20. Evaluate the author's use of contrasting narratives ('optimistic' vs 'pessimistic'). Is this an effective analytical structure? Why or why not? [1]

Analysis:

SUB-COMPONENT 3: Language Skills

5 Marks

Professional Communication, Rhetoric & Expression

5 Marks

 **Instructions:** Complete each task demonstrating sophisticated language use and communication clarity.

Q21. Write an email (5–7 sentences) professionally declining a job offer you have received, while maintaining a positive relationship with the company. [1]

Response:

Q22. Identify THREE rhetorical devices in the following sentence and explain the effect of each: "We shall fight on the beaches, we shall fight on the landing grounds, we shall fight in the fields and in the streets, we shall fight in the hills; we shall never surrender." — Churchill [1]

Response:

- Q23.** Paraphrase the following technical statement for a non-specialist audience in 2–3 accessible sentences: "Machine learning models trained on biased datasets exhibit systemic inferential errors that disproportionately disadvantage underrepresented demographic groups in automated decision systems." [1]

Response:

- Q24.** Construct a logical counter-argument to the following claim in 3–4 sentences: "All professional decisions should be driven entirely by data and metrics, as human judgment is inherently subjective and unreliable." [1]

Response:

- Q25.** Write the opening paragraph (4–5 sentences) of a formal report recommending that your organization adopt a 4-day working week. Establish context, purpose, and your recommendation clearly. [1]

Response:

QUANTITATIVE IQ

Advanced Problem Solving, Analytical Reasoning & Calculation

IQ Component: Quantitative IQ | Total Marks: 25 | Age Group: 19–32 Years | Estimated Time: 30 minutes

SUB-COMPONENT 1: Problem Solving

10 Marks

Part A — Applied Quantitative Problems

5 Marks

 **Instructions:** Solve each problem, showing full working. Partial marks are awarded for correct methodology.

- Q1.** A company's revenue grew 15% in Year 1 and 20% in Year 2, but declined 10% in Year 3. If the starting revenue was ₹50 lakh, what is the revenue at the end of Year 3? Express your answer to the nearest hundred rupees. [1]

Working & Answer:

- Q2.** Project A can be completed by 8 engineers in 12 days. Project B requires 6 engineers for 15 days. If the company has 14 engineers available, and both projects must be completed in 12 days, determine the optimal allocation of engineers to each project (assume engineers can be split across projects and work is divisible). [1]

Working & Answer:

- Q3.** A sum of ₹80,000 is divided among A, B, and C such that A's share is twice B's share, and B's share is 1.5 times C's share. What amount does each person receive? [1]

Working & Answer:

- Q4.** An investment earns compound interest at 8% per annum. After how many complete years will the investment first exceed double its original value? (Show your calculation using logarithms or trial method.) [1]

Working & Answer:

- Q5.** In a survey of 200 professionals: 120 use smartphones for work, 80 use tablets, and 40 use both. If a professional is selected at random, what is the probability they use smartphones OR tablets for work but NOT both? [1]

Working & Answer:

Part B — Data Analysis & Statistical Reasoning

5 Marks

 **Instructions:** Analyse the data and answer the questions. Show calculations where applicable.

Region / Quarter	Q1	Q2	Q3	Q4	Total
North	₹42L	₹48L	₹55L	₹61L	₹206L
South	₹38L	₹35L	₹41L	₹50L	₹164L
East	₹29L	₹33L	₹38L	₹44L	₹144L
West	₹51L	₹56L	₹49L	₹68L	₹224L

- Q6.** Which region achieved the highest year-on-year growth rate (Q1 to Q4)? Calculate the percentage growth. [1]

Answer:

- Q7.** What is the mean quarterly revenue across all four regions in Q3? [1]

Answer:

- Q8.** The West region set a target of ₹250L for the year. Calculate the percentage by which they fell short or exceeded their target. [1]

Answer:

- Q9.** If the East region's Q4 revenue grew by the same absolute amount in the following year's Q4, what would the new Q4 value be? [1]

Answer:

- Q10.** Rank all four regions by total annual revenue and identify the gap (in %) between the highest and lowest performers. [1]

Answer:

SUB-COMPONENT 2: Calculation Skills

10 Marks

Part A — Advanced Operations & Estimation

5 Marks

 **Instructions:** Solve with working shown. Mental estimation is acceptable for Part B.

- Q11.** Simplify: $(2^3 \times 5^2 - \sqrt{625}) \div (3^2 + 7)$ [1]

Working & Answer:

- Q12.** If $f(x) = 3x^2 - 4x + 2$, find $f(-3)$ and $f(5)$. [1]

Working & Answer:

- Q13.** Solve the simultaneous equations: $3x + 2y = 16$ and $5x - y = 9$ [1]

Working & Answer:

Q14. A loan of ₹2,00,000 at 9% p.a. simple interest is repaid over 3 years. Calculate total repayment and monthly instalment. [1]

Working & Answer:

Q15. Convert 0.00042 km to millimetres and express in standard scientific notation. [1]

Working & Answer:

Part B — Logical & Numerical Reasoning

5 Marks

 **Instructions:** Choose the correct answer or solve as indicated. Justify answers where prompted.

Q16. Critical Path: A project has tasks A(3 days), B(5 days), C(4 days, depends on A), D(2 days, depends on B), E(6 days, depends on C and D). What is the minimum project duration? [1]

Answer/Working:

Q17. Which value best completes the series? 1, 1, 2, 3, 5, 8, 13, ?, 34 [1]

- A. 18
- B. 20
- C. 21
- D. 23

Answer/Working:

Q18. If PRODUCT = 8, and it is calculated as $(P+R) \times (O+D) \times (U+C+T)$ [using alphabet position], what would TABLE equal using the same rule? [1]

Answer/Working:

Q19. A car depreciates 20% per year. If it is worth ₹8,00,000 today, what will its value be in 3 years (rounded to nearest ₹1000)? [1]

Answer/Working:

Q20. In a group of 120 people, 45% prefer tea, 35% prefer coffee, and the rest prefer neither. How many prefer neither? [1]

Answer/Working:

SUB-COMPONENT 3: Logical Reasoning

5 Marks

Formal Logic, Syllogisms & Strategic Thinking

5 Marks

 **Instructions:** Apply formal logical analysis. Consider all possibilities before answering.

Q21. Syllogism: Evaluate this argument — Premise 1: All innovative companies invest in R&D. Premise 2: Company X invests in R&D. Conclusion: Company X is innovative. Is this argument valid? Choose and justify: [1]

- A. Valid — the conclusion follows necessarily
- B. Invalid — the conclusion commits the fallacy of affirming the consequent
- C. Valid only if Company X is a startup
- D. Invalid due to insufficient premise strength

Answer/Justification:

Q22. You have 4 coloured boxes: Red (contains only apples), Blue (contains only oranges), Green (contains apples and oranges), Yellow (unknown). The boxes are all mislabelled. You can take ONE item from ONE box to correctly label all four. Which box do you choose and why? [1]

Answer/Justification:

- Q23.** Critical Reasoning: Identify the flaw in this argument: "Our new supplement increased the energy levels of 80% of participants in our study. Therefore, this supplement is more effective than all existing energy products on the market." [1]

Answer/Justification:

- Q24.** Conditional Logic: If 'A implies B' and 'B implies C' are both true, which of the following MUST be true? [1]
- A. C implies A
 - B. A implies C
 - C. Not-A implies not-C
 - D. C implies B and A

Answer/Justification:

- Q25.** Decision Matrix: You are choosing between three job offers. Rank them using the criteria below (weight: Salary 30%, Growth 40%, Work-Life Balance 30%): [1]
- A: Salary 8/10, Growth 7/10, WLB 9/10 Job B: Salary 9/10, Growth 9/10, WLB 5/10 Job C: Salary 7/10, Growth 8/10, WLB 8/10 Calculate weighted scores and select the optimal choice. Show working.

Answer/Justification:

PSYCHOMETRIC IQ

Cognitive Flexibility, Memory & Executive Attention

IQ Component: Psychometric IQ | Total Marks: 25 | Age Group: 19–32 Years | Estimated Time: 30 minutes

SUB-COMPONENT 1: Cognitive Flexibility

10 Marks

Advanced Abstract & Systems Thinking

5 Marks

 **Instructions:** These tasks assess your ability to shift between complex thinking frameworks.

[IMAGE PLACEHOLDER]

Advanced Matrix: 4×4 abstract pattern grid — Each cell contains a combination of 3 attributes: shape (circle/square/triangle/diamond), fill (empty/half/full), and number of internal lines (0/1/2/3). The pattern follows independent rules for each attribute across rows and columns. Bottom-right cell is missing. 6 options provided below.

(Large image | Insert before printing/digitizing)

Q1. Identify the rule governing EACH of the three attributes (shape, fill, internal lines) and use these to determine the missing cell. State your reasoning and select the correct option. [2]

Reasoning + Answer:

[IMAGE PLACEHOLDER]

Analogy diagram: Visual pairs showing transformations (e.g., 3D cube rotated; arrow pattern reflected; letter mirrored; overlapping shapes with one removed). Student must identify the transformation rule and apply it to a new input. 4 options shown.

(Large image | Insert before printing/digitizing)

Q2. Identify the transformation rule applied in each pair and apply it to complete the final analogy. State your logic. [1]

Rule + Answer:

- Q3.** Lateral Thinking Problem: A man walks into a bar and asks the barman for a glass of water. The barman looks at him, pulls out a gun and fires it at the ceiling. The man says 'Thank you' and walks out. Explain what happened and what this problem tests cognitively. [1]

Response:

- Q4.** Multi-framework Analysis: Describe the same situation (a company losing a key client) from THREE completely different analytical perspectives (e.g., financial, psychological, systemic). [1]

Response:

- Q5.** Constraint Removal: List FIVE conventional assumptions about 'offices' and for each, describe what work could look like if that assumption were removed. [1]

Response:

SUB-COMPONENT 2: Memory & Recall

10 Marks

Complex Working Memory & Information Processing

10 Marks — Administer
Timed Sections
Separately

 **Instructions:** Sections are timed. The administrator controls exposure and recall intervals. Mark answers as directed.

Memory Stimulus — Read for 90 seconds, then cover:

The Board of Directors of Meridian Technologies held its annual strategy meeting on the 14th of February at the Grand Lotus Hotel in Bengaluru. Seven board members were present: the CEO (Dr. Arjun Mehta), CFO (Ms. Priya Verma), CTO (Mr. David Chen), COO (Ms. Fatima Al-Rashid), Head of Legal (Mr. Rohan Bose), Chief Marketing Officer (Ms. Sunita Joshi), and an independent director (Mr. Erik Larsson). The meeting lasted 6 hours and covered five agenda items: Q4 financial results, international expansion (focusing on Southeast Asia), a proposed acquisition of CloudSoft Ltd for ₹320 crore, a new ESG policy framework, and succession planning for the retiring CFO. The Board voted 5-2 in favour of the CloudSoft acquisition.

Q6. List all seven board members present and their respective roles.

[2]

Answer:

Q7. What was the venue, date, and city of the meeting?

[2]

Answer:

Q8. List all five agenda items discussed.

[2]

Answer:

Q9. What was the acquisition target, its proposed value, and the voting outcome?

[2]

Answer:

Q10. Which future strategic focus region was mentioned and who is retiring?

[2]

Answer:

SUB-COMPONENT 3: Attention & Focus**5 Marks****Executive Attention, Dual Processing & Cognitive Control****5 Marks**

 **Instructions:** Complete each attention task accurately. Time limits apply where stated.

- Q11.** Stroop-Style Task (1 mark | 60 seconds): For each item, state the NUMBER OF LETTERS in the word, NOT what the word says. Work as quickly as possible. [1]
TEN SIX FOUR THREE EIGHT ONE SEVEN FIVE TWO NINE Answers
(in order): ____

Answer:

- Q12.** Dual-Task Monitoring (1 mark): Read the passage below, then: a) Count the [1]
total number of words that name animals. b) Identify the one word that
appears exactly FOUR times. Passage: 'The eagle soared above the valley
where the fox and the deer grazed peacefully, while the eagle watched from
above the ridge, scanning for movement below the valley floor, as the deer, fox,
and eagle have done for centuries.' a) Animals count: ____ Words: ____ b)
Word appearing 4 times: ____

Answer:

- Q13.** Executive Function — Task Switching (1 mark | 2 minutes): Alternate between [1]
two tasks for each item in the list: if the number is EVEN, multiply by 3; if ODD,
add 17. Process: 4, 7, 12, 9, 6, 15, 8, 3, 10, 11 Answers: ____

Answer:

- Q14.** Selective Attention — Error Hunt (1 mark): This numerical sequence follows a [1]
rule. Find ALL deviations from the rule. Rule: Each number is the sum of the
two preceding numbers. Sequence: 0, 1, 1, 2, 3, 5, 8, 14, 21, 34, 55, 89
Error positions and corrections: ____

Answer:

- Q15.** Sustained Concentration (1 mark): Proofread the following paragraph and identify [1]
EVERY error (grammar, punctuation, spelling, logic). List each error and
correction. 'The management team, which consist of five senior professionals,
has developed a strategic plan whom priorities digital transformation. The plan,
costed at ₹45 crore, will be implement over the course of three year, beginning in
January 2025.'

Answer:

PERFORMANCE IQ

Applied Skills: Reading, Visual, Kinesthetic, Self-Learning & Creative

IQ Component: Performance IQ | **Total Marks:** 25 | **Age Group:** 19–32 Years | **Estimated Time:** 35–40 minutes

SUB-COMPONENT 1: Reading & Writing

5 Marks

Advanced Analytical Writing & Critical Reading

5 Marks

 **Instructions:** *Demonstrate higher-order thinking through writing. Answers should be well-structured and evidence-based.*

- Q1.** Critical Analysis (1 mark): Read the claim: 'Remote work is definitively more productive than office work.' Write a balanced critique (5–7 sentences) — acknowledge the evidence supporting the claim and then substantively challenge its generalizability. [1]

Response:

- Q2.** Structured Argument (1 mark): Write a 5-sentence paragraph using the PEEL structure (Point, Evidence, Explanation, Link) arguing that governments should mandate mental health days as part of employee leave entitlements. [1]

Response:

- Q3.** Synthesis Writing (1 mark): In 4–5 sentences, synthesize the following two contradictory viewpoints into a nuanced position: View A: 'Technology is the [1]

primary driver of modern inequality.
of the modern age.'

View B: 'Technology is the great equalizer

Response:

- Q4.** Inference & Implication (1 mark): Read this statement and list THREE non-obvious implications it suggests: 'For the first time in history, the majority of the world's population lives in cities, and this proportion continues to grow.' [1]

Response:

- Q5.** Executive Summary Writing (1 mark): Write a 4-sentence executive summary for a report titled: 'Employee Wellbeing and Organisational Performance: A 3-Year Longitudinal Study Across 50 Indian Companies.' Assume the study found a strong positive correlation ($r = 0.74$). [1]

Response:

SUB-COMPONENT 2: Audio-Visual Processing

5 Marks

Complex Visual Analysis, Spatial Reasoning & Data Visualization

5 Marks

 **Instructions:** Interpret each visual stimulus carefully. Precision and depth of analysis are assessed.

[IMAGE PLACEHOLDER]

Scatter plot: X-axis = Hours of Training per Week (0–20), Y-axis = Performance Score (40–100). 25 data points plotted. A clear positive correlation visible with 3 outliers (2 high training/low

performance; 1 low training/high performance). Title: 'Training Hours vs. Performance Score — Sales Team (n=25)'

(Large image | Insert before printing/digitizing)

- Q6.** Analyse the scatter plot: a) Describe the overall trend and its strength. b) [2]
Identify and offer a hypothesis for each outlier type. c) What would a correlation coefficient of $r = 0.78$ mean in practical terms for this team?

Analysis (a, b, c):

[IMAGE PLACEHOLDER]

Complex flow diagram: An organizational change management process — 4 phases (Assess, Plan, Implement, Embed), each with 3 sub-steps, decision nodes (Go/No-Go gates), feedback loops from Phase 4 back to Phase 2, and a risk escalation path. Some connections are intentionally missing or mislabelled.

(Large image | Insert before printing/digitizing)

- Q7.** Review the change management process diagram: a) Identify any missing connections or logical errors in the flow. b) Explain the purpose of the feedback loop from Phase 4 to Phase 2. c) At which decision node would you add a stakeholder communication checkpoint, and why? [1]

Analysis (a, b, c):

- Q8.** 3D Spatial Reasoning: A cube is painted red on all 6 faces and then cut into 64 smaller equal cubes. How many of the smaller cubes have exactly 2 red faces? Show your reasoning. [1]

Working/Answer:

- Q9.** Visual Pattern Extrapolation: A fractal pattern starts with a single triangle. At each iteration, every triangle is subdivided into 4 smaller triangles and the centre one is removed. After 4 iterations, how many filled (non-removed) triangles remain? [1]

Working/Answer:

- Q10.** Information Architecture (1 mark): You are asked to design the navigation structure for a corporate intranet with 200+ pages. Sketch (in words or simple notation) a 3-level hierarchical structure and justify your top-level categories. [1]

Working/Answer:

SUB-COMPONENT 3: Kinesthetic Intelligence

5 Marks

Physical Coordination, Process Design & Applied Spatial Tasks

5 Marks

 **Instructions:** Some tasks are observed; others are self-reported. Be honest and specific.

- Q11.** Process Mapping (Observed | 1 mark): Using the physical materials provided (index cards and connectors), physically construct a process map for 'How to onboard a new employee in a company'. You have 4 minutes. Assessor rates clarity, logical sequence, and completeness. [1]

Response/Score:

- Q12.** Proprioception Self-Assessment (1 mark): Without looking at your hands, touch your index fingers together in front of you as quickly as possible. Do this 5 times. Record accuracy: ____ / 5. Now rate your confidence in your body's spatial awareness (1–5): ____ [1]

Response/Score:

- Q13.** Hands-On Assembly Task (Observed | 1 mark): Assemble the 7-piece geometric puzzle provided into the target shape shown on the card. Time limit: 3 minutes. Score: ____ (Completed within time / Required guidance / Incomplete) [1]

Response/Score:

- Q14.** Kinesthetic Learning Reflection (1 mark): Describe a skill (professional or personal) that you learned through physical practice. What was your progression from novice to competent? What did you notice about how your body learned differently from how your mind learned? [1]

Response/Score:

- Q15.** Embodied Cognition Task (1 mark | Observed): Walk the assessor through a physical process (e.g., making tea, tying a complex knot, folding a garment professionally) while simultaneously explaining the cognitive decisions being made at each step. Assessor scores coordination + articulation. [1]

Response/Score:

SUB-COMPONENT 4: Self-Learning

5 Marks

Autonomous Learning, Metacognition & Personal Development

5 Marks

 **Instructions:** These questions assess the sophistication of your self-directed learning practices. Depth and honesty are valued.

- Q16.** Describe the most complex skill or knowledge domain you have self-taught in the past two years. Detail your learning process: how you structured it, what resources you used, how you assessed your own progress, and what you would do differently. [1]

Response:

- Q17.** Identify a significant knowledge gap in your professional field. Design a 90-day self-learning plan to address it, including specific resources, milestones, and a method to verify learning. [1]

Response:

Q18. Metacognitive Inventory — Rate each statement (1=Never, 5=Always) and explain your lowest-rated item: _____ a) I pause to evaluate my understanding before moving forward. _____ b) I adjust my learning method when it is not working. _____ c) I seek feedback and incorporate it systematically. _____ d) I connect new information to existing knowledge frameworks. _____ Explain your lowest-rated item: _____ [1]

Response:

Q19. Transfer of Learning: Describe a time when knowledge or skills from one domain (e.g., a hobby, sport, or previous job) unexpectedly improved your performance in a completely different area. [1]

Response:

Q20. Learning From Failure: Describe a significant professional or academic failure. What specific cognitive or behavioural changes did you make as a result? How did you measure improvement? [1]

Response:

SUB-COMPONENT 5: Creative Intelligence

5 Marks

Innovation, Conceptual Originality & Creative Problem-Solving

5 Marks

 **Instructions:** Originality, strategic thinking, and creative courage are valued. There are no single correct answers.

- Q21.** Disruptive Ideation (1 mark): Identify ONE established practice in your professional field that has gone unquestioned for years but may be fundamentally flawed. Describe an alternative approach and anticipate the resistance you would face. [1]

Response:

- Q22.** Forced Connections (1 mark): Generate a genuinely innovative product or service idea by combining: 'public transport' + 'mindfulness' + 'subscription economy'. Describe the concept, its target users, and its value proposition in 4–5 sentences. [1]

Response:

- Q23.** Constraint-Based Creativity (1 mark): Design a community programme to improve mental health in your city using ONLY three resources: volunteers, smartphones, and public parks. Be specific, practical, and creative. [1]

Response:

- Q24.** Visual Concept Mapping (1 mark): In the space below, create a hand-drawn concept map connecting the following terms in a non-obvious, insightful way: Empathy / Algorithms / Trust / Privacy / Progress. [Free drawing space — 10cm × 8cm — to be provided here] [1]

Response:

- Q25.** First-Principles Redesign (1 mark): Challenge the fundamental assumptions behind 'performance reviews' in organizations. If you were designing a performance feedback system from scratch with no constraints, what would it look like? Ground your design in psychological principles. [1]

Response:
