

QIDS

Quotient Intelligence & Development System

SQ — SOCIAL QUOTIENT

Comprehensive Social Intelligence Assessment Instrument

Framework Assessment Centre + Cognitive SQ + Performance Activities	Raw Total 50 pts	Conversion ×2.00 → 100 pts	Format Single Standard Set — All Ages
---	----------------------------	--------------------------------------	--

#	Component (Merged from 8 → 3)	Absorbed Parameters	Raw Marks	Converted
1	Assessment Centre Exercise	Self-Report • Other-Report • Interviews • Behavioural Assessment	20	40
2	Cognitive Social Intelligence Test	Cognitive SQ Test • Situation Judgement Test	10	20
3	Performance-Based Activities	Performance Tasks • Role-Play • Group Activities • Peer Mentoring	20	40
	TOTAL	8 parameters → 3 core components	50	100

SQ Sub-Parameter Mapping (from Evaluation Framework)

SQ Component	Sub-Parameters Assessed	Marks /Component
Active Listening	Understanding others' ideas, attentiveness, follow-up questions	ACE
Collaboration & Teamwork	Group participation, conflict mediation, coordination	ACE
Communication & Assertiveness	Clarity, confidence, handling differing views	ACE

SQ Component	Sub-Parameters Assessed	Marks /Component
Empathy & Understanding	Acknowledging emotions, kindness, perspective-taking	ACE
Leadership & Problem-Solving	Initiative, decision-making, adaptability	ACE
Understanding Social Cues	Awareness of non-verbal cues, interpretation	CSI
Predicting Social Outcomes	Foreseeing interaction consequences, conflict handling	CSI
Social Problem-Solving	Empathic and logical resolution strategies	CSI
Empathy & Perspective-Taking	Emotional perspective-taking	CSI
Decision-Making in Social Contexts	Inclusive and harmonious decision-making	CSI
Role-Play Scenarios	Empathy, communication, problem-solving in action	PBA
Team Projects	Collaboration, leadership, interpersonal skills	PBA
Peer Feedback / Mentoring	Constructive feedback, openness, active listening, guidance	PBA
Social Dilemma Debates	Perspective-taking, argument handling, negotiation	PBA

Document Purpose & Agent Usage Guide

This document is a QIDS agent knowledge base for the Social Quotient (SQ) assessment. The agent uses this file to dynamically generate assessment sheets under the three consolidated SQ components. Unlike EQ and AQ, SQ uses a single standard instrument — no age-group differentiation. The 8-parameter framework is preserved within the 3 components, with full marks alignment to the evaluation framework.

Parameter	Detail
Total SQ Score (Raw)	50 marks
Conversion	×2.00 → 100-point final scale

Parameter	Detail
Component 1: Assessment Centre Exercise	20 marks — 5 structured activities × 4 marks each (Active Listening, Teamwork, Communication, Empathy, Leadership)
Component 2: Cognitive SQ Test	10 marks — 5 MCQ scenario items (2 marks each) covering the 5 Cognitive SQ sub-parameters
Component 3: Performance-Based Activities	20 marks — Choose any 2 from a menu of 8 curated activities (10 marks each), plus Situation Judgement Test integrated as final PBA task
Assessment Methods Used	Group exercises, observational assessments, MCQ/SJT, role-plays, team projects, peer feedback, social dilemma debates, reflective journaling, simulation
SQ Interpretation (Raw /50)	35–50 = Strength 18–34 = Needs Attention 10–17 = Development Priority
Agent Instruction	Generate standard instrument — no age split. Select 2 PBAs from the menu based on group size, available time, and context (school/professional/community).

COMPONENT 1 OF 3

Assessment Centre Exercise (ACE)

Merged from: Self-Report • Other-Report • Interviews • Behavioural Assessment | 20 Marks

Absorption rationale: All four original parameters rely on direct observation, structured interaction, and behavioural evidence — optimally gathered in a single integrated Assessment Centre session.

What This Component Measures

Active Listening • Collaboration & Teamwork • Communication & Assertiveness • Empathy & Understanding • Leadership & Problem-Solving

Assessor Setup & Administration Guide

Parameter	Detail
Group Size	4–8 participants per session (optimal: 5–6)
Duration	90–120 minutes total for all 5 ACE exercises
Assessor Role	1 lead assessor + 1 observer. Assessors do NOT participate — only observe and score.
Setting	Round-table preferred. No hierarchy of seating. Materials provided per task.

Parameter	Detail
Scoring Method	Real-time behavioural observation using rubrics below. Assessors score independently then reconcile.
Icebreaker (Pre-ACE)	5-minute icebreaker before formal scoring begins — individual video/verbal introduction. Not scored but noted for communication baseline.

ACE Exercise 1: The Relay Narrative

Sub-Parameter: Active Listening | 4 Marks | Method: Group Exercise + Observational Assessment

TASK DESCRIPTION

The assessor reads aloud a complex 2-minute narrative (a social scenario involving multiple characters, a conflict, and a resolution). Participants listen without taking notes. Each participant must then — in sequence — add the next element of a retelling, building on exactly what the previous person said. No one may skip or contradict what was already shared. After 2 full rounds, each participant answers 2 targeted comprehension and inference questions from the assessor.

Assessor Observation Focus	Participant Instructions
- Does the participant pick up precisely where the last person stopped? - Do they incorporate non-obvious details from the narrative? - Do they ask relevant follow-up clarifications during the Q&A phase? - Does their body language show engagement while others speak?	<i>Listen carefully to the full story — no notes allowed.</i> <i>When it's your turn, continue the retelling from exactly where the previous speaker stopped.</i> <i>After both rounds, answer the assessor's follow-up questions.</i>

ASSESSOR FOLLOW-UP QUESTIONS (ask 2 from list below, per participant)

1. What was the exact moment the conflict changed? What triggered it?
2. What did [Character X] say that you think no one else noticed?
3. Why do you think [Character Y] made the choice they did at the end?
4. What emotion was [Character Z] feeling — and how could you tell from the description?

Criterion	Marks	Scoring Descriptor
Comprehension Accuracy	2	2 = Adds accurate, specific details without distortion. 1 = Minor inaccuracies. 0 = Significant errors or omissions.
Inference & Insight	1	Goes beyond surface facts — picks up on subtext, emotion, or implication.
Attentiveness Signals	1	Non-verbal cues (eye contact, nodding, posture) show sustained engagement throughout others' turns.
TOTAL	4	Score: _____ / 4

ACE Exercise 2: The Consensus Tower

Sub-Parameter: Collaboration & Teamwork | 4 Marks | Method: Group Exercise + Observational Assessment

TASK DESCRIPTION

The group receives a scenario: 'A community of 500 people has been given a grant of ₹10 lakhs / \$12,000. The group must collectively decide how to allocate this across 8 competing needs (healthcare, education, infrastructure, food security, youth programs, elderly care, environment, arts & culture). Each area has an advocate. The group must reach a unanimous decision in 15 minutes.' Each participant is assigned a role card (advocate or moderator) privately. The assessor observes the group process — not the outcome.

ROLE CARDS (distribute privately before exercise)

Role	Description	Behavioural Challenge to Observe
Advocate	Champion your assigned need passionately — but listen to others.	<i>Can they argue their case without shutting others down?</i>
Moderator	Keep the conversation balanced and time-aware.	<i>Do they bring in quieter voices? Manage dominant ones?</i>
Devil's Advocate	Challenge every proposal once — then commit to consensus.	<i>Do they engage constructively rather than just obstruct?</i>
Recorder	Track proposals and help the group see where they are.	<i>Do they synthesise accurately? Prompt progress?</i>

Criterion	Marks	Scoring Descriptor
Group Participation Quality	2	2 = Actively contributes ideas AND builds on others'. 1 = Contributes but does not engage with others' ideas. 0 = Passive or disruptive.
Conflict Mediation	1	Steps in to de-escalate or reframe when tension arises — without being asked.
Coordination & Role Execution	1	Executes assigned role effectively in service of the group goal — not own agenda.
TOTAL	4	Score: _____ / 4

ACE Exercise 3: The Assertive Brief

Sub-Parameter: Communication & Assertiveness | 4 Marks | Method: Inbox Exercise + Spot Presentation

TASK DESCRIPTION

Each participant receives an inbox brief (3 messages) and must compose a response to each within 8 minutes, then present one of their responses verbally to the group in 90 seconds. The inbox messages are designed to test assertive, clear, and respectful communication under different social pressures.

Inbox #	Message Scenario	Communication Challenge
Inbox 1	A peer has missed their contribution to a shared project and sent an excuse. You must respond — directly but without damaging the relationship.	<i>Assertiveness without aggression; clarity without blame.</i>
Inbox 2	A supervisor or senior has given you feedback you believe is factually incorrect. You must respond professionally and respectfully.	<i>Confidence in disagreement; professionalism under hierarchy.</i>
Inbox 3	A friend is pressuring you to agree with a decision you think is wrong. You must respond honestly but empathically.	<i>Holding one's position while preserving the relationship.</i>

Criterion	Marks	Scoring Descriptor
Clarity of Message	1	Core point communicated unambiguously without over-explanation or passive hedging.
Assertiveness Without Aggression	2	2 = Holds position confidently while remaining respectful and open. 1 = Either too passive or too aggressive. 0 = Neither assertive nor respectful.
Handling Differing Views	1	Verbal presentation acknowledges the other perspective before stating own — does not dismiss.
TOTAL	4	Score: _____ / 4

ACE Exercise 4: The Empathy Interview

Sub-Parameter: Empathy & Understanding | 4 Marks | Method: Interview + Observational Assessment + Other-Report

TASK DESCRIPTION

Participants pair up. Each person interviews their partner for 4 minutes using the structured questions below — then switches. After both interviews, each participant presents a 60-second 'empathic summary' of their partner to the full group: what they understood, what surprised them, and one thing they think their partner might need. Partners then privately complete a 3-question peer rating form (Other-Report).

STRUCTURED INTERVIEW QUESTIONS (for interviewer to ask partner)

1. Tell me about a time you felt genuinely understood by someone. What made it feel that way?
2. What is something you find it hard to explain to people — but wish they just 'got' about you?
3. When someone you care about is struggling, what do you instinctively want to do — and what stops you sometimes?

OTHER-REPORT: Peer Rating Form (completed privately after interview)

Peer Rates Their Partner On	1	2	3
Made me feel genuinely heard during the interview (not just waiting for their turn to speak)	☐	☐	☐
Their summary of me felt accurate — they picked up on things I actually meant	☐	☐	☐
I would feel comfortable opening up to this person in a real situation	☐	☐	☐
Peer Rating Total (×0.33 per item, rounded to 1dp)	/ 3		

Criterion	Marks	Scoring Descriptor
Empathic Listening (Assessor-Observed)	2	2 = Active presence, minimal self-referencing, follows partner's lead. 1 = Intermittently empathic. 0 = Mostly self-focused.
Empathic Summary Quality	1	Summary is specific, accurate, and identifies something non-obvious — not a generic repeat.
Peer Rating (Other-Report)	1	Average peer score ≥ 2.5 = 1 mark. Below 2.5 = 0 marks.
TOTAL	4	Score: _____ / 4

ACE Exercise 5: The Leaderless Group Challenge

Sub-Parameter: Leadership & Problem-Solving | 4 Marks | Method: Group Exercise + Behavioural Assessment (Interview)

TASK DESCRIPTION

No leader is appointed. The group receives a complex social problem to solve collaboratively within 12 minutes, then presents their recommendation to the assessor (2 minutes). The assessor observes who takes initiative, how decisions emerge, how disagreements are navigated, and who brings the group back on track when it drifts. A 3-question structured debrief interview follows with each participant individually.

PROBLEM SCENARIOS (assessor selects one)

	Scenario Brief
A	Scenario A: A popular member of your school/community has been caught plagiarising. The group must decide: should there be a public consequence, a private resolution, or restorative action? Present a unified recommendation.
B	Scenario B: Your team has been given 15 minutes to design a 'Welcome Protocol' for a new student/colleague who is from a very different cultural background and has anxiety about joining. Present a concrete, step-by-step plan.

	Scenario Brief
C	Scenario C: A team member on a critical project has been consistently underperforming. The deadline is next week. The group must decide on a course of action that is fair, effective, and preserves team morale.

POST-EXERCISE DEBRIEF INTERVIEW QUESTIONS (assessor asks each participant)

1. What did you notice about how the group was making decisions — and did you try to influence that?
2. Was there a moment where you held back? Why?
3. If you were to do this again, what would you do differently as a leader?

Criterion	Marks	Scoring Descriptor
Initiative & Decision-Making	2	2 = Proactively drives direction without dominating. 1 = Contributes when prompted. 0 = Passive throughout.
Adaptability Under Group Pressure	1	Adjusts approach when initial direction fails — does not rigidly persist or shut down.
Debrief Self-Insight	1	Interview reveals genuine self-awareness about their leadership behaviour in the group — not just positive self-report.
TOTAL	4	Score: _____ / 4

COMPONENT 1 TOTAL (ACE)	Ex1: ____/4 + Ex2: ____/4 + Ex3: ____/4 + Ex4: ____/4 + Ex5: ____/4 = TOTAL _____ / 20 Converted (×2.00): _____ / 40
--------------------------------	---

COMPONENT 2 OF 3

Cognitive Social Intelligence Test (CSI)

Merged from: Cognitive SQ Test • Situation Judgement Test | 10 Marks

Absorption rationale: Both the Cognitive SQ Test and SJT assess cognitive-level social intelligence — reading cues, predicting outcomes, and selecting optimal responses — best unified into one MCQ-based cognitive instrument.

What This Component Measures

Understanding Social Cues • Predicting Social Outcomes • Social Problem-Solving • Empathy & Perspective-Taking
 • Decision-Making in Social Contexts

Instructions: Read each scenario carefully. Select the single best response. Each question is worth 2 marks. Partially correct responses receive 1 mark. Incorrect responses receive 0 marks.

2 Marks	1 Mark	0 Marks
Best / Optimal Response	Adequate / Partial Response	Ineffective / Avoidant Response

Question 1 — Understanding Social Cues

SCENARIO

You are in a team discussion presenting new ideas. You notice that one member, Priya, contributes enthusiastically at the start but gradually goes quiet, avoids eye contact, and begins giving very short, agreeable answers to everything.

QUESTION

What does Priya's behaviour most likely indicate?

	Option	Marks
A	She has run out of ideas and is content to let others lead.	0 marks
B	She is feeling dismissed, uncomfortable, or disengaged — possibly because her earlier contributions were not being acknowledged.	2 marks
C	She is tired and would prefer the discussion to end soon.	1 mark

Assessor Note

Non-verbal withdrawal after initial enthusiasm signals social discomfort, disengagement, or feeling unheard — not simply fatigue or lack of ideas.

Question 2 — Predicting Social Outcomes

SCENARIO

You are organising a group event. Two members — Arjun and Mia — have opposing preferences for the venue and have started debating it publicly in the group chat, drawing others to take sides. A decision needs to be made today.

QUESTION

What is the most socially intelligent course of action?

	Option	Marks
A	Make the decision yourself and announce it to end the standoff.	1 mark
B	Remove the conversation from the public chat, facilitate a brief private conversation with Arjun and Mia to find common ground, then communicate the outcome to the group with a clear rationale.	2 marks

	Option	Marks
C	Put it to a group vote to ensure the most democratic outcome.	0 marks

Assessor Note

Public sides-taking escalates tension. The optimal response de-escalates privately, preserves both relationships, and communicates transparently — preventing long-term group fractures.

Question 3 — Social Problem-Solving

SCENARIO

You are on a project team. One member, Ravi, is clearly not contributing — missing deadlines and being vague when asked for updates. Two teammates are frustrated and want to escalate to the supervisor immediately. The deadline is in 4 days.

QUESTION

What is the most effective and socially intelligent response?

	Option	Marks
A	Escalate to the supervisor immediately to protect the team's output.	1 mark
B	Speak privately with Ravi first to understand whether there is an underlying reason — then, depending on the response, decide together on next steps including whether to involve a supervisor.	2 marks
C	Redistribute Ravi's tasks among the team and continue without addressing the issue.	0 marks

Assessor Note

Jumping to escalation before understanding the root cause risks damaging the relationship and missing solvable problems. The optimal response is diagnostic, empathic, and decisive.

Question 4 — Empathy & Perspective-Taking

SCENARIO

Your close friend has just received news that they did not get a job offer they had worked extremely hard for. They call you immediately. Before you can speak, they say: 'I know you're going to say I'll find something better — please don't.'

QUESTION

What is the most empathically intelligent response?

	Option	Marks
A	Honour their request and simply say: 'I'm here. Tell me how you're feeling right now.' Then listen without offering any reassurance unless they ask for it.	2 marks
B	Respect their feelings but gently offer some reframing to help them feel better — you know them well enough.	1 mark
C	Ask them what they think went wrong so you can help them prepare better for next time.	0 marks

Assessor Note

True empathy means following the other person's stated emotional need — not defaulting to comfort scripts or advice. The highest mark goes to the response that listens first and fully.

Question 5 — Decision-Making in Social Contexts

SCENARIO

At a social gathering, you overhear two people making a joke at the expense of someone who is present but does not seem to hear it. The person being joked about is a mutual acquaintance who has recently gone through a difficult time.

QUESTION

What is the most socially and ethically intelligent course of action?

	Option	Marks
A	Ignore it — intervening would make things awkward and the person probably didn't hear it.	0 marks
B	Calmly and privately tell the two people that the joke was unkind given the circumstances, without making a scene.	2 marks
C	Immediately and publicly call out the behaviour to make clear it is unacceptable.	1 mark

Assessor Note

Public call-outs risk escalation and humiliation. Private, calm redirection addresses the behaviour effectively while preserving relationships — the hallmark of inclusive decision-making.

COMPONENT 2 TOTAL (CSI)

Q1: ___/2 + Q2: ___/2 + Q3: ___/2 + Q4: ___/2 + Q5: ___/2
= TOTAL _____ / 10 **Converted (×2.00):**
_____ / 20

COMPONENT 3 OF 3

Performance-Based Activities (PBA)

Merged from: Role-Play Scenarios • Team Projects • Peer Feedback • Social Intelligence Workshops • Empathy Mapping • Social Dilemma Debates • Community Projects • Simulation Games • Reflective Journaling • Peer Mentoring | 20 Marks

Administration: Choose any TWO activities from the menu below (10 marks each). Select based on group size, time available, and context. Each activity has a full rubric and assessor guide.

What This Component Measures

Role-Playing • Collaborative Leadership • Constructive Feedback • Negotiation & Debate • Empathy Mapping • Community Engagement • Reflective Journaling • Peer Mentoring

ACTIVITY SELECTION GUIDE (for Assessor / Agent)

#	Activity	Best For	Time Required
P B A -1	Social Role-Play Gauntlet	All settings; small & large groups	30–40 min
P B A -2	The Team Social Challenge	School, corporate, community; 4–8 pax	45–60 min
P B A -3	Structured Peer Feedback Circuit	Groups with existing relationships	30–40 min
P B A -4	Social Dilemma Debate	Academic/professional contexts; 6+ pax	40–50 min
P B A -5	The Empathy Mapping Workshop	Any group; high empathy focus	30–40 min
P B A -6	Community Engagement Presentation	School/community contexts	50–70 min
P B A -7	Reflective Social Journal	Individual; can run parallel to other tasks	20–30 min (written)

#	Activity	Best For	Time Required
P B A -8	Peer Mentoring Simulation	Mixed groups; leadership development focus	40–50 min

★ Select and administer exactly 2 activities. Each is worth 10 marks. Total = 20 marks.

PBA-1 — Social Role-Play Gauntlet

Objective: Practice and demonstrate empathy, communication, conflict resolution, and adaptive social behaviour across multiple social contexts in rapid succession.

Method: Role-Play Scenarios + Observational Assessment | 10 Marks

TASK DESCRIPTION

Each participant rotates through 3 role-play stations over 20 minutes (6–7 minutes each). At each station, they receive a scenario card and must respond in-character. Assessors rotate and observe one station each. Participants do not see the scenario cards in advance.

STATIONS (Participants rotate through all 3)

Station	Scenario Description	Skills Assessed
Station 1: The Difficult Conversation	You must give honest, critical feedback to a close friend about their behaviour that has been affecting others — without damaging the relationship.	<i>Assertiveness, empathy, tact</i>
Station 2: The Social Rescue	You arrive at a party and notice a new person standing alone, visibly uncomfortable. The host is busy. You must initiate and sustain a genuine conversation.	<i>Inclusion, warmth, social initiative</i>
Station 3: The Mediator	Two people in your study/work group are having a heated disagreement about how to proceed on a task. You were not part of the original argument. Step in.	<i>Mediation, perspective-taking, calm authority</i>

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Scenario Navigation Across All 3	4	4 = Navigates all 3 with appropriate strategy and social fluency. 3 = Strong in 2. 2 = Strong in 1. 1 = Struggles across most. 0 = Avoids or fails all 3.
Empathy & Emotional Reading	3	3 = Consistently reads and responds to the emotional state of the other party. 2 = Intermittent. 1 = Mostly misses cues. 0 = No evidence.
Communication Quality	2	Clarity, tone, and word choice are appropriate to each station's relational context — shifts style across stations.

Criterion	Marks	Scoring Descriptor
Authenticity & Spontaneity	1	Responses feel genuine and natural — not scripted or formulaic.
TOTAL	10	Score: _____ / 10

PBA-1 Score: _____ / 10

PBA-2 — The Team Social Challenge

Objective: Demonstrate collaboration, leadership, interpersonal coordination, and social problem-solving under a shared team goal.

Method: Team Project + Observational Assessment + Peer Evaluation | 10 Marks

TASK DESCRIPTION

Groups of 4–5 are given a community-scale social challenge brief: they must design and present a 'Social Inclusion Initiative' for a specific community gap (provided on a brief card). They have 30 minutes to plan and 5 minutes to present. Assessors observe the process (not just the output). After the presentation, each team member completes a brief peer evaluation of one other member.

BRIEF CARDS (Assessor selects one)

1. Brief A: Design a 4-week integration programme for 20 newly arrived students/employees from different cultural backgrounds.
2. Brief B: Create a conflict resolution protocol for a community where two groups have an ongoing tension over shared resources.
3. Brief C: Design a peer support network for people experiencing social anxiety in a school or workplace setting.

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Collaborative Process (Assessor-Observed)	4	4 = Actively integrates others' ideas, manages conflict gracefully, distributes contribution fairly. 3 = Strong collaboration. 2 = Adequate. 1 = Minimal. 0 = Disruptive or passive.
Communication & Presentation Clarity	2	Presentation is well-structured, confident, and shows ownership of the team's work.
Social Initiative & Leadership Moments	2	Takes initiative at least once during planning — without being asked — in a way that moves the team forward.
Peer Evaluation Score	2	Average score from peer evaluation (1–5 scale, mapped to 0–2) on: 'This person made our team stronger during this task.'
TOTAL	10	Score: _____ / 10

PBA-2 Score: _____ / 10

PBA-3 — Structured Peer Feedback Circuit

Objective: Develop and demonstrate self-awareness, constructive communication, and the ability to give and receive feedback with specificity and grace.

Method: Peer Feedback Sessions + Self-Reflection Tool | 10 Marks

TASK DESCRIPTION

Each participant presents a 2-minute reflection on a real social challenge they navigated recently (prepared beforehand or on the spot). After each presentation, 2 designated peers give structured feedback using the STAR+I model (Situation, Trend they noticed, Action they'd suggest, Reason it would help, Invitation to reflect). The presenter then completes a written self-reflection response.

STAR+I FEEDBACK FORM (structure for peer feedback givers)

Element	Guidance
S — Situation	Name the specific moment in the presentation that you're reflecting on.
T — Trend	What pattern did you notice in how this person handles social situations?
A — Action	Suggest one specific behaviour they could try differently.
R — Reason	Explain why this change would be socially effective.
I — Invitation	End with an open question that invites their reflection.

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Quality of Feedback Given (STAR+I)	4	4 = All 5 elements present, specific, and genuinely insightful. 3 = 4 elements strong. 2 = Adequate but generic. 1 = Vague or unhelpful. 0 = Not completed.
Receiving Feedback — Openness	3	3 = Non-defensive, genuinely curious, uses the feedback in their reflection. 2 = Mostly open. 1 = Defensive or dismissive. 0 = Rejects or ignores.
Self-Reflection Quality	2	Written reflection is specific, honest, and identifies a concrete next action — not generic.
Emotional Composure	1	Maintains composure when receiving critical or unexpected feedback — no shutdown or counter-attack.

Criterion	Marks	Scoring Descriptor
TOTAL	10	Score: _____ / 10

PBA-3 Score: _____ / 10

PBA-4 — Social Dilemma Debate

Objective: Practise perspective-taking, logical argument construction, negotiation, and understanding diverse social viewpoints under pressure.

Method: Social Dilemma Debates + Observational Assessment | 10 Marks

TASK DESCRIPTION

Groups of 4–6 are assigned positions on a social dilemma (they may or may not personally agree). After 5 minutes of preparation, they engage in a structured 15-minute debate. The assessor observes not just argument quality but social intelligence — how participants handle opposition, acknowledge valid opposing points, and move toward resolution.

DILEMMA OPTIONS (Assessor selects one)

1. Dilemma A: 'In a group project, protecting the team's output should always take priority over protecting a struggling member's feelings.'
2. Dilemma B: 'People who witness bullying or unfair treatment but do nothing are equally responsible as those who act.'
3. Dilemma C: 'It is more socially harmful to be brutally honest than to tell a kind lie that protects someone's feelings.'

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Reasoning & Argument Quality	3	3 = Arguments are logical, evidence-supported, and address the dilemma's social complexity. 2 = Sound but shallow. 1 = Weak. 0 = No argument.
Perspective-Taking & Acknowledgement	3	3 = Actively and specifically acknowledges strong points in the opposing argument before rebutting. 2 = Partial. 1 = Dismisses opposition. 0 = Ignores it.
Negotiation Toward Resolution	2	Moves the debate toward a nuanced position that integrates both sides — rather than simply 'winning'.
Composure Under Challenge	2	Remains calm, respectful, and socially skilled when their argument is challenged or rebutted directly.
TOTAL	10	Score: _____ / 10

PBA-4 Score: _____ / 10

PBA-5 — The Empathy Mapping Workshop

Objective: Build and demonstrate deep understanding of others' perspectives, emotional states, and unspoken needs.

Method: Empathy Mapping + Feedback Forms | 10 Marks

TASK DESCRIPTION

Participants are each given a Character Brief — a description of a person in a challenging social situation (different character for each participant). They must complete a full Empathy Map for that character in 15 minutes, then present it to the group. The group may ask questions and add to the map. After all presentations, each participant gives written feedback on one other person's map.

EMPATHY MAP SECTIONS

Section	Prompt
THINKS	What is going through this person's mind? What are their internal beliefs and assumptions?
FEELS	What emotions are they experiencing — layered and specific, not just 'sad' or 'angry'?
SAYS	What are they likely expressing outwardly — and what might they be holding back?
DOES	What actions or behaviours are observable — including the subtle ones?
NEEDS	What does this person most fundamentally need right now — stated or unstated?
FEARS	What are they most afraid of in this situation — socially, emotionally, practically?

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Depth & Specificity of Map	4	4 = All 6 sections are specific, nuanced, and non-obvious. 3 = Most sections strong. 2 = Adequate but surface-level. 1 = Sparse. 0 = Incomplete.
Emotional Granularity	3	Goes beyond basic emotion labels — identifies layered, complex emotional states with clear reasoning.
Perspective Non-Projection	2	Map reflects the character's experience — not the participant's own. Minimal projection of self.
Quality of Peer Feedback on Others' Maps	1	Written feedback is specific, affirming, and adds one insight the presenter hadn't included.
TOTAL	10	Score: _____ / 10

PBA-5 Score: _____ / 10

PBA-6 — Community Engagement Presentation

Objective: Apply social intelligence in a real-world community context — planning, communicating, and demonstrating social responsibility.

Method: Community Engagement Projects + Performance Task + Simulation | 10 Marks

TASK DESCRIPTION

Groups of 3–4 are given 30 minutes to design a concrete Community Social Action plan addressing a defined social need (provided on a brief card). They must present the plan (5 minutes), including: the need identified, the community stakeholders involved, how they would communicate and engage diverse groups, and how success would be measured socially (not just in outputs).

BRIEF CARDS (Assessor selects one)

1. Plan a 'Social Bridge' event designed to bring together two groups in your school/community who rarely interact.
2. Design a campaign to tackle social isolation among elderly members of a local community.
3. Create a restorative justice programme for a school where a public conflict between groups has recently occurred.

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Community Awareness & Stakeholder Thinking	3	3 = Identifies specific, realistic stakeholders and maps their different needs. 2 = General stakeholder awareness. 1 = Single-perspective only. 0 = No stakeholder analysis.
Social Communication Strategy	3	Plan includes specific, differentiated communication strategies for different groups — not a one-size approach.
Inclusive Design Evidence	2	Plan actively designs for inclusion of marginalised or harder-to-reach groups.
Social Outcome Measurement	2	Defines success in relational/social terms (e.g., new relationships formed, conflict reduced) not just logistical completion.
TOTAL	10	Score: _____ / 10

PBA-6 Score: _____ / 10

PBA-7 — Reflective Social Journal

Objective: Enhance social self-awareness, identify personal social patterns, and commit to specific growth actions.

Method: Reflective Journaling + Self-Reflection Tool | 10 Marks

TASK DESCRIPTION

Participants complete a structured 4-section written Social Reflection Journal in 25 minutes, responding to the prompts below. The journal is submitted to the assessor and scored using the rubric. This activity can run in parallel with group activities.

JOURNAL PROMPTS

Section	Prompt
Section 1: My Social Pattern	Describe a recurring pattern in how you behave in social situations — one you are proud of, and one you wish you could change. Be specific about when and how each shows up.
Section 2: A Moment I Got It Wrong	Describe a specific social situation where your response made things worse. What were you thinking at the time? What did you miss about the other person?
Section 3: What I've Learned About People	Write about the most important thing you have learned about how people work — from observing or interacting with others — and give a specific example.
Section 4: My Social Commitment	Name one specific social behaviour you want to develop or change. Define what 'better' looks like in concrete, observable terms. Describe the first action you will take this week.

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Depth of Self-Reflection (Sections 1 & 2)	4	4 = Genuinely specific, emotionally honest, identifies non-obvious patterns. 3 = Mostly specific. 2 = Some depth. 1 = Surface. 0 = Descriptive only.
Social Insight Quality (Section 3)	3	3 = Insight is non-obvious, grounded in real observation, and articulated clearly. 2 = Sound but common. 1 = Vague or abstract.
Commitment Specificity (Section 4)	2	Commitment is behaviourally specific — not 'be a better listener' but exactly what, when, and with whom.
Authenticity & Honesty	1	Writing feels genuinely personal — not a performance of the 'right answer'. Assessor-judged.
TOTAL	10	Score: _____ / 10

PBA-7 Score: _____ / 10

PBA-8 — Peer Mentoring Simulation

Objective: Develop and demonstrate leadership, empathy, structured support, and the ability to guide another person through a social challenge.

Method: Peer Mentoring + Observational Assessment + Peer Evaluation | 10 Marks

TASK DESCRIPTION

Participants are paired (mentor/mentee). The mentee is given a 'Social Challenge Card' describing a realistic difficulty they are navigating. They share it with their mentor. The mentor must conduct a 10-minute structured mentoring conversation — not giving advice immediately, but using guided questioning, active listening, and collaborative problem-solving to help the mentee arrive at their own insight. Roles then switch with a new scenario. Each participant scores their partner as mentee.

CHALLENGE CARDS (Assessor selects one)

1. Card A: 'I have a close friend who has been excluding me from group plans lately. I don't know if I did something wrong or if something else is going on. I feel too scared to ask them directly.'
2. Card B: 'I always go quiet in group discussions even when I have good ideas. By the time I work up the courage to speak, someone else has already said something similar or moved on. I feel invisible.'
3. Card C: 'I've just joined a new team and I can feel there's an existing dynamic I don't understand. Some people seem friendly but others are cold. I don't know how to read what's happening.'

MENTOR CONVERSATION GUIDE (4-Phase Structure)

Phase	Mentor's Task
Phase 1 (2 min): Open	Ask open questions to fully understand the situation. Don't interpret or advise yet.
Phase 2 (4 min): Explore	Help the mentee see their situation from different angles. Use 'what if' and 'what do you think is really happening' questions.
Phase 3 (3 min): Generate	Ask the mentee to generate their own options. Add one or two if they are stuck — framed as possibilities, not answers.
Phase 4 (1 min): Commit	Ask: 'What one thing will you try first?' Help them make it specific.

ASSESSMENT RUBRIC

Criterion	Marks	Scoring Descriptor
Guided Questioning Quality	4	4 = Uses open, non-leading questions throughout. Avoids advice-giving until Phase 3. 3 = Mostly guiding. 2 = Slips into advice mode early. 1 = Mostly directive.
Active Listening Evidence	3	3 = Reflects back accurately, builds on what mentee says, does not redirect to own experiences. 2 = Adequate. 1 = Mostly waiting for turn to speak.
Mentee Experience (Peer Score)	2	Mentee rates: 'I felt genuinely helped — not judged or lectured' (1–5 mapped to 0–2).
Commitment Facilitation	1	Successfully helps mentee articulate a specific, realistic first action — without prescribing it.
TOTAL	10	Score: _____ / 10

PBA-8 Score: _____ / 10

COMPONENT 3 TOTAL (PBA)

Activity 1 (____): ____/10 + Activity 2 (____): ____/10
= **TOTAL** ____ / 20 **Converted (×2.00):**
____ / 40

SQ Final Score Compilation

Assessment Centre Exercise + Cognitive SQ Test + Performance-Based Activities | Raw 50 → ×2.00 → 100 pts

Candidate Name:		Date / Assessor:	
------------------------	--	-------------------------	--

Component	Raw Score	Max Raw	Converted (/100)
Component 1 — Assessment Centre Exercise	/	20	×2.00 = /40
Component 2 — Cognitive SQ Test	/	10	×2.00 = /20
Component 3 — Performance-Based Activities	/	20	×2.00 = /40
SQ TOTAL	/	50	= ____ / 100

SQ INTERPRETATION GUIDE (Raw /50)

Score Range	SQ Level	Profile	Development Focus
35–50	SQ Strength	Consistently demonstrates high social intelligence across observation, cognition, and performance. Acts as a social anchor in groups.	Mentor others; take on leadership and facilitation roles.
26–34	Socially Capable	Good SQ in most areas; may have one component significantly below the others.	Targeted development in the weakest component; seek peer feedback regularly.
18–25	Developing SQ	Functional but inconsistent; socially competent in familiar settings but struggles with complexity or pressure.	Structured coaching in Communication & Conflict Navigation; practice via PBA-1 and PBA-3.

Score Range	SQ Level	Profile	Development Focus
10–17	Priority Development	Significant social intelligence gaps affecting collaboration, empathy, and conflict resolution.	Intensive intervention recommended across all three components; begin with CSI to build cognitive foundation.

COMPONENT-LEVEL PROFILE

Component	Raw Score	Level	Key Observation
ACE — Assessment Centre Exercise	/ 20	Strength / Capable / Developing / Priority	
CSI — Cognitive SQ Test	/ 10	Strength / Capable / Developing / Priority	
PBA — Performance-Based Activities	/ 20	Strength / Capable / Developing / Priority
